

Jahanzaib Ahmad

Product Designer & UI/UX Specialist · Mobile Apps, SaaS & Design Systems

Location: Remote Worldwide (Open to Contracts & Full-Time)

Email: jahanzaibahmad630@gmail.com

Portfolio: jahanzaibahmad630-bit.github.io

Contra: contra.com/jahanzaib_ahmad_49mo9t8e

GitHub: github.com/jahanzaibahmad630-bit

Product-minded UI/UX Designer with **1+ years of intense production experience** architecting end-to-end mobile applications (iOS/Android), high-density FinTech and prop trading platforms, SaaS dashboards, and scalable Figma design systems. Holds a **Bachelor of Business and Information Technology (BBIT)**, bridging user psychology, business logic, and front-end engineering literacy. Proven track record delivering production-ready component architectures, developer-aligned tokens, and high-fidelity interactive prototypes that streamline handoff and accelerate ship velocity.

CORE COMPETENCIES

Mobile App UX (iOS HIG & Material 3)

Interactive Prototyping

FinTech & Prop Trading UX

Figma Variables & Design Tokens

High-Density SaaS Dashboards

Information Architecture & User Flows

Wireframing & Rapid Iteration

Developer Handoff Specs

Tailwind CSS & HTML/JS Literacy

Klaviyo & Responsive Email UI

PROFESSIONAL EXPERIENCE

Product Designer & UI/UX Consultant

2025 – Present · Remote

Independent Client Practice

Contract & Project-Based

- End-to-End Product Design:** Partnered with international founders, startups, and boutique development teams across FinTech, Web3, and mobile consumer apps to design intuitive zero-to-one user experiences.
- Design Systems Architecture:** Built modular, scalable Figma design systems with auto-layout 5.0, variables, dark/light modes, and semantic tokens, cutting developer implementation time by ~40%.
- Interactive Prototyping:** Engineered high-fidelity interactive web prototypes with realistic states, animations, and micro-interactions, validating UX decisions with stakeholders prior to engineering handoff.

FEATURED FLAGSHIP PROJECTS

OPTIONS FUNDING — Institutional Prop Trading Platform

FinTech SaaS · 2026

Lead Product Designer & Technologist

Web App

- Trading Challenge Portal:** Architected end-to-end evaluation portal featuring dynamic account size tiers (\$10k–\$200k), consistency rule validation, leverage toggles, and instant profit-split calculators.
- Financial UI Hierarchy:** Designed Bloomberg-grade dark telemetry interface optimizing high-density numerical tables, margin indicators, and drawdown risk gauges for high-stress trading environments.
- Engineering Delivery:** Formulated tokenized Figma component libraries and clean Tailwind CSS responsive styling ready for immediate frontend integration.

HINA — Nightlife Companion & Safety Buddy System

iOS & Android · 2026

Lead Mobile UX Designer & Prototyper

Mobile App

- 20-Screen Mobile Flow:** Designed comprehensive mobile journey covering rapid onboarding, QR-code buddy pairing, venue check-in checkouts, and low-friction emergency panic detours.
- Interactive Simulator:** Built fully interactive dual-mode simulator featuring 4-digit PIN verification, SVG countdown grace timers, and haptic feedback audio cues for edge-case user testing.
- Platform Compliance:** Strictly adhered to Apple iOS Human Interface Guidelines (HIG) with accessible 44pt touch targets, WCAG AAA color contrast, and seamless bottom-sheet drawer patterns.

Senior UI/UX Designer

Infrastructure SaaS

- **Telemetry Console:** Designed high-density node monitoring dashboard displaying cluster latency, validator distribution, liquidity pool metrics, and automated quote-pair execution.
- **Cognitive Simplification:** Converted multi-tiered cryptographic infrastructure logs into intuitive visual hierarchy cards with status pill indicators and real-time state transitions.

LÉMAN HORLOGERIE GENÈVE — Haute Horlogerie Digital Showcase

Luxury Brand & Interactive Web · 2026

Creative Director & UI/UX Technologist

Interactive Experience

- **Bespoke Digital Exhibition:** Crafted an editorial digital flagship showcasing mechanical watchmaking heritage, featuring 207-part exploded movement views, live winding mechanics, and 60fps parallax motion.

TECHNICAL TOOLING & METHODOLOGIES

Design & Prototyping

Figma (Auto-Layout 5.0, Component Sets, Variables, Interactive Prototypes, Tokens), FigJam, Whimsical, Adobe Photoshop, Adobe Illustrator.

Product & UX Research

Information Architecture, User Journey Mapping, Wireframing, Usability Testing, Heuristic Audits, Design System Documentation.

Frontend & Engineering Literacy

HTML5, CSS3/Tailwind CSS, JavaScript, Developer Handoff, Design-to-Code Implementation, Git/GitHub, Klaviyo Email Design.

Platform & Design Standards

Apple iOS Human Interface Guidelines (HIG), Android Material Design 3, WCAG 2.1 Accessibility Standards, Responsive Web.

EDUCATION

Bachelor of Business and Information Technology (BBIT)

Graduated

Focus on Business Systems, Human-Computer Interaction & Software Project Strategy

Equipped with an interdisciplinary foundation integrating enterprise business logic, user psychology, information systems architecture, and modern product development workflows.
